

OFFICE OF THE STATE ENGINEER

DISTRICT 3 Gila/San Francisco Water Master Report 2025

Data collected and report prepared by Office of the State Engineer District 3 staff.

Disclaimer:

This report is not the final irrigated acreage report required by the courts per the Arizona V California Decree. The final irrigated acreage report must be requested from the Interstate Stream Commission (ISC). This report contains data collected by the Office of the State Engineer's District 3 Office. This data is forwarded to the ISC for inclusion in the final irrigated acreage report.

Aerial imagery is provided by ESRI and is not representative of the time period for which irrigated acreage checks were conducted. Aerial imagery is provided for bearing purposes only.

MEMORANDUM

State Engineer

Deming, New Mexico

May 28, 2026

FILE Arizona v. California Decree

TO Elizabeth K. Anderson, P.E. State Engineer and
Secretary - Interstate Stream Commission

FROM Martin McMillan
Gila - San Francisco and San Simon Creek Watermaster

SUBJECT 2025 Watermaster Report of Irrigated Acreage and Water Diversion
for other than irrigation purposes in the Gila - San Francisco, San
Simon Creek, and Virden Valley Water Basins.

REFERENCE Annual reporting for the Gila River Basin in New Mexico pursuant to
Decree entitled Arizona v. California, 376 US 340 (1964).

Transmitted herewith are the 2025 Field Check Sheets and summaries of irrigated acreage within the above stated basins as compiled by the OSE District 3 Staff.

These tabulations are based on field crop surveys conducted during the months of June and July. It should be noted that the determination to record fields as irrigated or fallow was based on a single observation during this time period. Fields recorded as fallow may have been cultivated and irrigated before or after the data collection of this survey.

Water diverted for purposes other than irrigation: It should be noted that domestic uses for single-households and stock uses are not required to be metered under the Decree. Further, domestic wells with water rights transferred in for outside uses may not be metered if they serve single households.

Additionally, as a result of the maximum uses allowed within New Mexico under the Decree, domestic wells are permitted for non-consumptive indoor use only. Since the Decree, adjudicated irrigation uses have been transferred to some of these non-consumptive domestic wells allowing for outside use including stock, lawns, gardens and trees. The totality of the uses from these transfers is not reflected in this report.

A. Gila-San Francisco:

Annual field check of irrigated acreage disclosed that approximately 3220.55 acres of agricultural lands were irrigated at the time of the survey. See the enclosed irrigated acreage summary for the total rights of each "area" and the type and amount of irrigated acreage. Also enclosed is the Gila-San Francisco 2025 annual meter report. Total metered diversion reported for irrigation purposes of 10 acres or more is 11,789.15 acre-feet, for irrigation purposes of less than 10 acres is 28.64 acre-feet, and for non-irrigation purpose is 376.42 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

2025 Annual irrigated Acreage

1. San Francisco River hydrographic area:

a) Apache Creek-Aragon Area:

Annual field check of irrigated acreage disclosed that approximately 209.25 acres were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of less than 10 acres is 4.08 acre-feet, and for non-irrigation purpose is 7.07 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

b) Luna Area:

Annual field check of irrigated acreage disclosed that approximately 85.09 acres were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of less than 10 acres is 0.00 acre-feet, and for non-irrigation purpose is 9.66 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

c) Reserve Area:

Annual field check of irrigated acreage disclosed that approximately 290.96 acres were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of less than 10 acres is 0.00 acre-feet, and for non-irrigation purpose is 75.06 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

d) Glenwood-Mule Creek Area:

Annual field check of irrigated acreage disclosed that approximately 614.95 acres were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of 10 acres or more is 218.14 acre-feet, for irrigation purposes of less than 10 acres is 12.04 acre-feet, and for non-irrigation purpose is 68.01 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

2. Gila River Hydrographic area:

a) Cliff-Gila Area:

Annual field check of irrigated acreage disclosed that approximately 1867.54 acres were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of 10 acres or more is 226.39 acre-feet, for irrigation purposes of less than 10 acres is 12.52 acre-feet, and for non-irrigation purpose is 67.14 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

Meter readings disclose that 784.66 acre-feet were diverted from the Franks Well Field for municipal use in the town of Silver City, which is located in the Mimbres Underground Water Basin.

Monthly reports disclose that a total of 8,424.58 acre-feet of water were diverted for industrial and mine operations at the Tyrone Mine and they received a seepage credit for Bill Evans Dam for a total of 27.54 acre-feet. License 02260 and GSF-85 are charged with 7,266.57 acre-feet.

On the date of the annual irrigated acreage inspection, personnel found Bill Evans reservoir 90% full.

b) Redrock Area:

Annual field check of irrigated acreage disclosed that approximately 104.29 acres were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of 10 acres or more is 10.54 acre-feet, and for non-irrigation purpose is 3.43 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

c) Upper Gila Area:

Annual field check of irrigated acreage disclosed that approximately 48.47 acres were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of 10 acres or more is 0.00 acre-feet, and for non-irrigation purpose is 120.98 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.

Snow Lake was approximately 60% full and Wall Lake has water but has been silted in and of very low capacity, Lake Roberts Reservoir was 90% full to capacity on the dates observed.

B. Virden Valley Area:

Annual field check of irrigated acreage disclosed that approximately 1968.42 acres were irrigated under Globe Equity 59 and 53.32 acres were irrigated under AZ vs.CA decree at the time of the survey. Total amount reported for metered irrigation wells was 9148.30 acre-feet and for non-irrigation purpose is 35.03 acre-feet. This amount does not include non metered water used entirely for single-household domestic, stock, and irrigation.

C. San Simon Area:

Annual field check of irrigated acreage, observations and calculations disclose that approximately 680.99 acres of agricultural land were irrigated at the time of the survey. Total metered diversion reported for irrigation purposes of 10 acres or more is 2185.78 acre-feet, and for non-irrigation purpose is 25.07 acre-feet. This amount does not include water used entirely for single-household domestic, stock, and irrigation.
